Research interests

Face perception; facial morphometrics and geometric morphometric methods; first impressions and social trait inference; Bayesian inference and hierarchical modelling; psychometrics and latent-variable modelling; psychological data science.

Education

PhD, Psychology — Bangor University, 2010–2013. Pass with no corrections.

BSc (Hons), Psychology — Bangor University, 2007–2010. First Class.

Employment

Associate Professor of Psychological Data Science — School of Psychology, Swansea University, 2025–present.

Senior Lecturer in Psychology — Swansea University, 2020–2025.

Lecturer in Psychology — Swansea University, 2016–2020.

Postdoctoral Research Associate — Gettysburg College, USA, 2014–2015.

Postdoctoral Research Associate — Bangor University, 2013–2014.

Teaching

Module convenership

PSY334 — Evolutionary Perspectives on Psychology, Swansea University. Module lead. Final year undergraduate module.

PSM-99 - Quantitative Perspectives on Psychology - from Measurement to Models, Swansea University. Module Lead. MSc Research Methods module.

Online courses (open access)

Data Analysis with Python — alexjonesphd.github.io/python_data_analysis. A free introduction to the Python scientific stack for social-science researchers.

Statistical Modelling with Python — alexjonesphd.github.io/statistical_models_python. A more advanced course on building and interpreting statistical models in Python, including Bayesian methods with PyMC.

Teaching qualifications

PGCertHE / Fellow of AdvanceHE (FHEA), 2018.

Research supervision

PhD — Three students supervised to completion in last 5 years.

MSc thesis supervision — 3–6 students per year over the past decade.

BSc dissertation supervision — 7–10 students per year over the past decade.

Service

Grant review

Grant panel member, Research Foundation – Flanders (FWO), 2024–2025.

Ad hoc grant reviewer — Economic and Social Research Council (ESRC, UK); Czech Science Foundation.

Editorial roles

PLOS ONE - 2019-2023 Evolution and Human Behaviour - 2022-Present

Professional memberships

Experimental Psychology Society.

Industry consulting

Consulting and applied research collaborations with industry partners on behavioural and psychological data, including Boots, Chanel, CyDen Ltd, eharmony, and Vanquis.

Technical skills

Programming — Python (advanced; primary research language), R.

Probabilistic programming — PyMC (primary), with experience in Stan and bambi.

Statistical methods — Bayesian hierarchical modelling, structural equation modelling, item response theory, generalised linear and mixed-effects models, geometric morphometric methods, multivariate methods.

Open Science — All recent work shared via OSF (osf.io/v3p5g); code on GitHub (github.com/alexjonesphd).
